

JOBIE BARREDO

Iloilo City, Philippines | +63 967 386 5864 | jbbarrodo@gmail.com

OBJECTIVE | To secure a challenging position in the information technology field where I can apply my skills and contribute to the success of the team. I bring a proven track record of dedication, reliability, and a commitment to ongoing learning in the dynamic IT landscape. Eager to leverage my technical expertise while continuously developing my abilities to enhance overall team performance.

SKILLS & ABILITIES

- **Core Backend Development:** Expertise in the .NET ecosystem, specifically **.NET 10, C#, ASP.NET Core,** and **Entity Framework Core.**
- **Frontend Frameworks:** Proficient in building interactive and responsive user interfaces using **Blazor, React,** and **Angular.**
- **Database Management:** Advanced experience in designing and managing relational databases including **MSSQL, MySQL,** and **PostgreSQL.**
- **Cloud & Architecture:** Strong understanding of **Microservices architecture, RESTful API design,** and cloud-native orchestration with tools like **.NET Aspire.**
- **AI Integration:** Experience implementing local **Large Language Models (LLMs)** using **Ollama** and **LM Studio** (e.g., DeepSeek, Qwen).
- **AWS Services:** Hands-on experience with **ECS (Elastic Container Service)** utilizing **Task Roles** for granular IAM security, and managing application configurations via **AWS Systems Manager (SSM) Parameter Store.**
- **Cloud Messaging:** Implementation of **AWS End User**

Messaging for transactional communication.

EXPERIENCE | Full Stack .NET Developer – Gabtech Global LLC
FEBRUARY 2025 – JULY, 2026

Spearheaded the development and successful production delivery of the **IDSMS Program Wizard**, an enterprise housing grant and rehabilitation management application. Led the architecture, database design, core module implementation, and document generation workflows.

Responsibilities:

- Spearheaded the project from inception to shipment, architecting the core data access layer using Repository and Unit of Work (UoW) patterns.
- Led the end-to-end development of key modules, including the Scope of Work (SoW) engine (with drag-and-drop ordering and tier calculations) and the Payment Draws processing workflow.
- Engineered the document automation and reporting engine, building dynamic template-merging systems to generate legal grant agreements, promissory notes, and PDF draw reports.
- Managed database schema migrations, navigation properties, and transaction boundaries in SQL Server using Entity Framework Core.
- Resolved critical backend latencies, database concurrency issues, and SQL query performance bottlenecks prior to production deployment.

Tech stack:

- C#
- .NET 9 (ASP.NET Core Blazor Server / Interactive Server)
- Entity Framework Core (EF Core)
- Microsoft SQL Server (MSSQL)
- Active Directory Services / ASP.NET Core Identity
- GroupDocs.Conversion
- QuestPDF / PdfSharpCore
- Serilog (Structured Logging)
- Git / Azure DevOps

Software Developer – Harris Global Business Services Inc.
JULY 2024 – JULY, 2025

As a Software Developer to an Australian-based Medical (Maternity) Business Unit of Harris GBS, I was tasked with configuring existing Medical Software to meet Client requirements based on the acknowledged scoping documents for each Hospital/Facility

Responsibilities:

- Develop new features and/or Update existing Maternity Model as requested by the Hospital/Facility to meet scoping document requirements
- Import existing features to Hospital/Facility that require similar implementation
- Conduct testing of Configuration changes made by other Developers

Tech stack:

- C#
- MSSQL
- Jira
- XML

SR FullStack .NET Developer (Contractor) –
Cloud Employee APAC, INC.

OCT 2024 – APR 2025

Worked as a contractor for a UK-based company in the business of selling hotel accommodations for all kinds of tourists per season (mainly winter) - Assigned to the payments team to work with their own partner (Computop and Mythos). Mostly working with frontend to consume backend operations/actions.

Responsibilities:

- Work with Product Manager to identify UI/UX decisions for the checkout flow of hotel reservations
- Making sure the checkout flow is always user friendly and prevent double-bookings
- Review PR when needed

Tech stack:

- ASP.NET MVC/Web API
- VueJS, Vuex
- Entity Framework
- Dapper

- MSSQL
- Umbraco CMS
- Github for Repo
- Datadog

Freelance Developer – Independent Contractor

JULY 2024 – OCT 2024

Developed a POS/Inventory type for a small printing-press office and a Pet Shop here in Iloilo City, Philippines - In house hosting setup for a web-based MIS application with up to 15 concurrent users.

Responsibilities:

- Meet with client to discuss requirements planning and budget
- Develop and deliver agreed requirements in a 2-week basis
- Deploy and setup system to client's on-prem server
- Release updates for support to bugs or issues

Tech stack:

- ASP.NET Core MVC/WebAPI
- Angular
- Blazor SSR
- Azure DevOps (Ticket management)
- MSSQL
- Entity Framework Core
- Github for Repo

DEVELOPER – FULL SCALE LLC

DECEMBER 2021 – JULY 2024

Full stack web developer for a donor-platform US-based client. Using C# & .NET as the main programming language for backend specifically for different services, API endpoints for webhook and public consumption.

Payments team designation.

Responsibilities:

- Maintain and develop solutions for client needs (backend and frontend)
- Create/Update SQL scripts
- Integrate w/ different payment platforms (US region)
- Conduct code review of PRs submitted by team
- Conduct pair programming to promote teamwork and confidence

Tech stack:

- ASP.NET MVC/WebAPI
- ReactJS, MaterialUI
- MySQL, Dapper
- Jira/Confluence
- Github
- AWS (Secrets Manager)
- Stripe Integration
- PayPal Integration

IT LEAD – FLOW HEALTH OUTSOURCING INC.

MAY 2020 – NOVEMBER 2021
